Market intelligence on critical material supply chains

Forward-looking statements

This document may contain forward-looking statements that are subject to risks and uncertainties. All statements that are not historical facts contained within are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "can", "might", "believe", "may", "estimate", "continue", "anticipate", "intend", "should", "plan", "could", "expect", "predict", "potential", or the negative of these terms or other similar expressions.

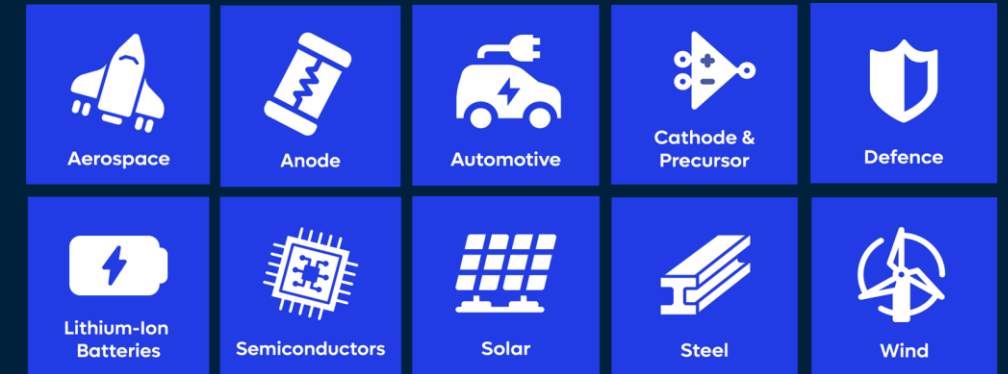

Forward-looking statements are based on information and assumptions that Project Blue had when those statements are made or its good faith belief as of that time with respect to future events. Forward-looking statements are subject to risks and uncertainties that could cause actual performance or results to differ materially from those in or suggested by the forward-looking statements. Except as required by law, Project Blue undertakes no obligation to update publicly any forward-looking statements after the date of this publication release, or to conform these statements to actual results or changes. While consideration has been taken in preparing the information published in this report, the content is provided without any guarantees, conditions, or warranties as to its accuracy, completeness, or reliability.

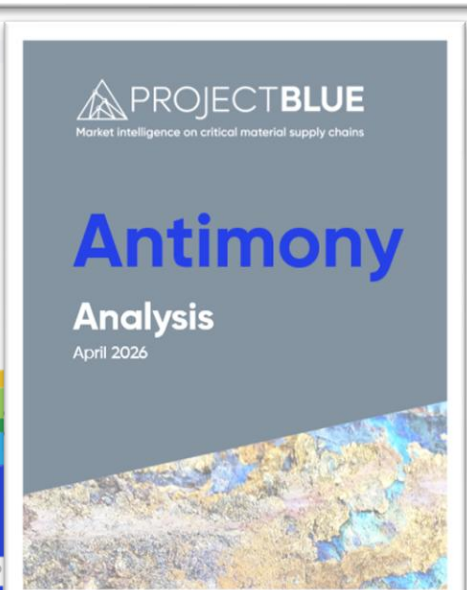

We accept no liability to third parties, howsoever arising. Although reasonable care and diligence has been used in the preparation of this report, we do not guarantee the accuracy of any data, assumptions, forecasts or other forward-looking statements.
